

## Mother To Battle For Boy Actor

**LILLIAN MAE BARTHOLOMEW**  
Determined to regain the custody of her film star son, Freddie Bartholomew, 12, and his \$1,500 a week salary, Mrs. Lillian Bartholomew, 35, is pictured as she arrived in New York from England.

## Parent of Child Film Star To Fight Custody

LOS ANGELES, April 14.—Freddie Bartholomew's mother, travelling under an assumed name, reached Los Angeles last night and immediately contacted attorneys, preparing to open a legal fight for custody of her actor-son.

Mrs. Bartholomew's lawyer, L. J. Meyberg, said the custody fight probably would be based on alleged misrepresentation of facts when Miss Bartholomew gained guardianship of the child actor.

## MANITOBA IN FLOOD'S PATH

WINNIPEG, April 14.—Steadily rising waters of the Assiniboine river lapped at low-lying sections of central Manitoba today, bringing concern to city and rural resi-

Water gauges at the wheat city registered a rise of 25 inches during the past 24 hours. Civic authorities were providing accommodation in unoccupied houses and buildings for a number of families.

## BOMBS PERIL

## SPAIN'S HEAD

MADRID, April 14.—One police lieutenant was killed, another was seriously wounded, and a number

of civilians were trampled and eaten in the capital today during celebration of the fifth anniversary of the founding of the republic. The disorders began when a series of small bombs were exploded behind

The blasts, which hurt no one, created panic among the spectators, with many injuries resulting from

## Youth Killed By Spark When He Views Fight

GEORGETOWN, British Guiana, April 14.—Samuel King, 22-year-old carpenter who climbed an electric light pole last night to see the Kid Tanner-Id Singh featherweight boxing bout, was electro-

...tioned when his head grazed a high vision cable during the exciting ninth round. Bystanders said King lost his last cent on Tanner, British Louisiana featherweight champion, and had not enough money to pay

# WHEELS MUCH DETAILED WORK, EXPENSE IN EXPERIMENT

**Aviation Engineers Set To Work But Solution Still Appears Five Years in the Future.**

**LOS ANGELES, April 14.**—Aviation engineers have set to work in earnest on the problem of designing ships for atmospheric flying, but the solution still appears five years in the future.

Construction of pressure-chambered airplanes, designed to carry loads in comfort at altitudes of from 20,000 to 50,000 feet is not a task involving any hastily new ideas but rather it is one that will take much detailed work and expensive experimentation.

**DIFFICULTIES OUTLINED**

L. A. Klein, associate professor of aerodynamics at California Institute of Technology at Pasadena, outlined some of the difficulties in building a commercially satisfactory high altitude "pullman."

"The hard wing is about the only part of the present ship that could be used in a pressure-chambered transport plane," he declared.

**ENTIRELY NEW PLANE**

"It is necessary to design and build an entirely new aircraft, one with a pressurized cabin and cockpit, heated to a point where passengers could remain comfortable for from 12 to 20 hours."

Small will cover the necessary mechanisms for the cabin and cockpit, and will include a power source on all devices, and provisions against emergencies in the case of breakdowns.

**U.S. PASTOR CALLED HERE**

**HUDSON, Mass., April 14.**—Rev. Scourgon M. Hirtle, who resigned his pastorate at the "United Church" of this town rather than work on an oath of citizenship which would require him to bear arms, here has accepted a call to the Stratton Baptist church to begin May 1.

Rev. Mr. Hirtle, a native of Nova Scotia, had educated in the United States, offered his resignation when he said a minority of his church members would not accept the oath of citizenship.

He said he could not take the oath because it would require a mental reservation on the part of the citizen, and he felt that such a reservation was unwarranted.

He said he was not a native-born American, and he felt that he was not a native-born American, and he felt that he was not a native-born American.

**NEW, STRANGE LENDY KIDNAP STORY IS TOLD**

**TRENTON, N.J., April 14.**—A woman with a new and strange version of the Lindbergh kidnap-murder case came before the Mercer county grand jury today as it proceeded with its second session.

It is the second session of the grand jury, which is now in its second session. It is the second session of the grand jury, which is now in its second session.

## CODE BILL TO BE EFFECTIVE ON WEDNESDAY

**First Sub-Section of Master Code Blankets All Businesses**

With the code into force on Wednesday of the bill to "provide for the registration and licensing of businesses and occupations" the activities coming under these heads obtain required licenses before they can operate. This bill covers the entire business community.

Ernest C. Manning, provincial secretary and minister of trade and industry, stated that the bill is applicable to all trades, businesses and occupations, except those to which exemption is granted.

**LICENSE FORMS MAILED**

License forms will be sent out from Hon. Mr. Manning's office to all trades and occupations and these will be filed and stamped in the minister's office, after which licenses will be issued.

So far, the Master Code for the retail trade and the code covering the doctors and dentists have been proclaimed. Much work has been done toward the bakers and barbers, and the code for the hotel and restaurant industry is being prepared.

The bill coming into effect on Wednesday will be the first of a series of bills to be passed by the legislature, which will be the first of a series of bills to be passed by the legislature.

**MAYOR CLARKE COMMITTED TO HIGHER COURT**

TUESDAY, APRIL 14

### THE OUTLOOK

Announcement by Hon. W. A. Fallow that  
he may see a few-day tour of the building  
program started in Alberta has been followed  
by official predictions that mid-summer may  
find the "employable unemployed" in the  
province busy as far as the building program  
is concerned.

There will be hope everywhere that these  
predictions may be fulfilled. Tempered of  
course by recognition of the fact that the  
unemployed and may not be capable of complete  
fulfillment.

There has been no clearing of the farm out-  
look such as is likely to cause farmers to take  
care of many more hands than they did last  
spring, and no improvement in the farmer's  
condition that would make it possible for him  
to do so. And with farm work and the  
more plentiful than last year, it will take a vast  
amount of road-work to absorb the balance  
of the unemployed who are fit for such employ-  
ment.

If the "employable unemployed" are reduced  
by mid-summer to half their number a year  
ago, that will be a very long step toward the  
restoration of "seasonal employment" to normal,  
with a gratifying easing of the relief prob-  
lem for the summer months.

### THE MERCHANTS' PROTEST

Hon. E. C. Manning and the Retail Mer-  
chants' Association have got into a clinch, over  
the question of the "employable unemployed."  
The Master Code seemed to imply pretty  
clearly that the administering and enforcing was  
to be done by the Association, and was evidently  
understood by the members of that organiza-  
tion. But the Minister has a different idea, and  
says he will do it himself.

For reasons which he sets forth in a  
published statement, but without mentioning  
—what seems to be the fact—that he intends to  
apply the regulation in a more lenient disposi-  
tion than he thinks fair to the merchants, the  
Association might dispute. His explanatory statement  
since the introduction of the system have been  
very general and that the public might be  
wary because they won't notice the difference.

This, the Association has made plain, is not  
according to the program as understood, and  
it is all satisfactory to the merchants, and  
to be regulated, it is argued they ought to do  
the regulating themselves, and thought this is what  
was intended.

Ministerial application and enforcement of  
the regulations was not what seemed to be pro-  
posed, but Mr. Manning's statement it was  
quite plain that the merchants are to have  
representative body of merchants acting in an  
advisory capacity only.

### KEMAL SEES THE POINT

Turkey wants to re-affirm the Dardanelles,  
which it cannot legally do without consent of  
the other parties to the Treaty of Lausanne.  
True to the Turkish traditions of Turkish dispo-  
sition, the request is made on the ground that  
re-occupation of the Rhineland may start war so  
suddenly there would not be time to get consent  
and put the guns in place before the resumption  
of war and the outbreak of hostilities.

What is really troubling the Government of  
Turkey is not the Rhineland, but the failure of  
the League to do anything effective to prevent  
Abyssinia from conquest. Since one small mem-  
ber of the League has been crushed by a  
powerful one, what is the use of the League?  
member, Turkey for instance, suffering the same  
at the hands of the same or some other  
powerful neighbor?

When the League called for sanctions against  
Italy, Turkey responded promptly. Kemal  
Pasha has no notion Mussolini has forgotten  
that and no notion that the League would  
be applied to save Turkey than were  
used to protect Abyssinia. Hence he wants to  
join the Dardanelles, and the League to have  
shares with batteries, but Constantinople find  
itself in the position of Adria Ababa, and Turkey  
follow Ethiopia into destruction.

As the League has failed, it cannot or will  
not protect its smaller members, they quite  
naturally will want to take what measures they  
can to protect themselves.

### THE BUDGET BE "HANGED"

Hon. T. A. Crevar is quite right in thinking  
he is "telling no secrets" when he says the  
Department has been "hanged" by the  
balance, and it is impossible for the Govern-  
ment to impose taxes on the people which would  
bring it into balance.

statement, and there is no cause given for con-  
plaint.

Everybody has expected to the point of cer-  
tainty that the budget would be out of balance,  
and nobody who moves along the common ways  
of life supposes it would be possible to collect  
money enough to balance the budget. It is not  
likely that the Government will attempt to do  
it, and would only another chapter of tragedy to  
the national book of lamentations which con-  
stitutes the record of the late and unimpaired  
administration.

Of course the budget will be out of balance.  
It should be out of balance. And it should stay  
out of balance. The Government problem  
has been solved, and until the evils which cause  
and are caused by unemployment have been  
cleared away.

The present Government was not elected to  
squeeze money out of the taxpayers in a for-  
lorn hope that it could thereby balance the  
budget. It was elected to balance the budget, and  
wanted, they would have returned Mr. Bennett,  
whose Government only failed in its budget-  
balancing intentions because taxation reached  
the point of diminishing returns.

The present Government was elected to re-  
store to Canadians the opportunity to support  
themselves, and to balance their own budgets  
by their own earnings. When that has been  
done, increased revenues and reduced expendi-  
tures will bring the Government's budget into  
balance with no taxation on the part of the  
Ministers and no resultant damage to the  
public. Until it has been done, budget-balancing  
could be made the object of Ottawa only on  
the supposition that book-keeping is more  
important than business, and equilibrium in the  
national ledger of more consequence than men  
and women.

It is not the Government's business to  
balance the budget. It is the business of the  
people to balance their own budgets. The Gov-  
ernment's business is to provide the opportunity  
for the people to do so.

## The Passing Show

By J. A. COWPER

The film at last has become the great popu-  
lar teacher—the people's University.

Near midnight last Thursday, too mentally  
jaded to go home and sleep, I dropped into the  
Rhodes theatre and saw the picture of "Rhodes."  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.  
I was not alone. I was not alone. I was not alone.

## Tularemia

By DOCTOR FRANK MCCOY

The district of Tulare has the honor of  
having a disease named for it. The disease is  
tularemia, first described in Tulare, California,  
and is an acute, infectious disease. In the  
beginning it was supposed that the disease was  
limited to the Western states, but with a better  
recognition of it, it has been found that tularemia occurs  
in almost all of the states in the Union. Evidently the dis-  
ease is spreading rapidly and may be expected to increase.

The infectious organism is the bacterium tularemia,  
which is frequently found in rodents, or gnawing animals,  
particularly in rabbits and those who handle them. It is also  
transmitted to man by the handling of the skins of infected animals. The disease is  
easily transmitted from animal through the bite of the tick, the deer-fly, the squirrel flea, and  
other insects. Most cases occurring in humans are picked up from rabbits infected with  
tularemia appears to be a very interesting thing to  
study.

## Jealousy Is Worst Enemy of Happiness

DEAR MISS DIX:—I am having a terrible jealous streak that is making me do foolish things and putting wrinkles in my face. My husband works with a very attractive and sweet girl. I know she is crazy about him and he likes her, but I am sure I'm the one he loves. Lately she has been waiting to walk home with him and that is what has got me all worked up. It makes me so resentful toward him that I don't treat him right. A couple of times I have shown my jealousy of her by telling her and he just thought me silly. How shall I treat the situation? Tell her to leave her hands off him or just kid him about her? She probably will go on working with him and walking home with him, so what is there for me to do? I hate this being jealous, and I hope you can knock it out of me some way or another.

MRS. S. A.

Answer: You are the first green-eyed woman I have ever encountered who realized that jealousy made her do foolish things, or perhaps you care yourself. The only remedy for jealousy is an application of common sense to the situation.

## Minute Make-Ups

By V. V.

The fact that your husband chose you out of all the world for a wife should prove to you that you are his type, and until you have strong evidence to the contrary you are justified in believing that he still prefers you to any other woman. Now have you any proof that the girl is in love with your husband. Because you are in love with him is no sign that any other woman is.

Again I appeal to your common sense when I call your attention to the fact that being jealous, making scenes and accusing your husband of things which he may not have done, is no way to win a husband back even in case he has run away from home. Many a jealous wife turns a blind eye to a serious affair by her reproaches, her suspicions, her tears and her general making things so unpleasant for husband that he flees to the Other Woman for comfort. Many a wife, jealous for tomorrow's breakfast, has first inkling that he is finally

## HERE'S YOUR FAVORITE BREAKFAST

TRY this hearty, nourishing breakfast, for those lagging morning appetites. Crisp, delicious Shredded Wheat, topped with fresh or canned fruits or berries—pour on rich, wholesome milk. It's a real meal! And it's packed with energy—because Shredded Wheat is 100% whole wheat. You get Nature's own natural balance of vital food essentials. Other Shredded Wheat for tomorrow's breakfast.

## Good Rouge Does Not Harm Facial Features

By GLADYS GLAD

"Dear Miss Glad: I have noticed enlarged pores on my cheeks and a friend recently told me that it was due to the fact that I always use dry rouge. She told me that I should use liquid rouge instead. Do you think dry rouge harmful, and liquid rouge more advisable for my use?"

A good brand of dry rouge will not harm your skin or enlarge your pores if you prepare your skin properly for its application. I always use it thoroughly after the use of this cosmetic. As a matter of fact, I prefer the dry rouge and a dust of liquid rouge in the first place, rouge in liquid form is difficult to apply so that it looks natural. The dry rouge is much more in line with nature on the cheeks. And in the second place, liquid rouge is generally considered drying to the skin. It cleanses your skin properly, lubricates, stimulates and protects it sufficiently, the dry rouge should in no way harm it.

"Dear Miss Glad: I'm going shopping next week, and for once, thanks to you, I needn't be ashamed of my skin. You see, I followed that grand reducing course outlined in your 'New Face' booklet, and lost 35 pounds, which should save me what a hippopotamus I previously was. And I don't have to fear the sleek, slender lines of the new styles. However, I saw a slight reddish tint in my hair. Could you tell me how to prepare a mild vegetable or henna shampoo to use?"

To prepare a shampoo of the type you refer to, take a cake of pure castile soap and cut it into four shavings. Add to this two ounces of powdered pure Egyptian henna, one ounce of borax and a quart of boiling water. Allow the mixture to simmer over a slow fire until all the soap is dissolved, then stir it cool. When using this shampoo, dry the hair thoroughly with a towel, dry the hair three consecutive shampoos with the mixture, and permit the last henna to remain on the hair for eight to ten minutes. Then wash your hair thoroughly with a vinegar rinse as the last rinse. This shampoo is a mild one and should bring out the lovely reddish highlights in your hair.

"Dear Miss Glad: I've always had great trouble with my hair, and goodness, they've always been com-

## Your Children -

By OLIVE ROBERTS

The day that Mary Louise's pink dress brought her pink dress and Mary Louise was so pleased she could hardly wait to tell Betty and Ruth and Katharine about it. They had heard she had a new dress, too, of course, but they were sure it was brown and red. So when Mary Louise tried to show them her new dress, they thought of some other girl's dress and didn't want to explain. Now pretty her new dress was, but they couldn't find it so interesting.

"But you'll see it soon," she promised happily.

O. R. Barlow

They didn't. Mary Louise's mother had bought the dress away carefully and only let her small daughter wear it to Sunday school on Sunday morning, and when important gown looks came to dinner.

"What would you like to wear to school today?" she asked Mary Louise one day.

"My pink dress," came the hopeful answer.

"But that's a dress-up dress. What about the blue plaid?"

Then the school had a special program. Surely now, they could wear the pink frock! But her mother decided that white would be much nicer. Betty and Ruth and Katharine wanted to wear the dress at all, if Mary Louise hadn't brought them into the house eight or nine weeks back.

## A BEDTIME STORY

Story by HAL COCHRANE Pictures by GEORGE SCARBO

The Tiny girls slid to the ground, and burst and looked around. "He sure dropped when I told him," the old prospector said.

"He knows he shouldn't do that," he said, but he was too tired to say more. He also knows that, for his mind, he will be well fed.

"Oh, feeding him should be real fun. Please let me do it, when it's time."

"Don't worry. I know I won't fail. He sure isn't hard at all," said Duncy. Then he scrambled on the ground and looked at the bear. The bear was very short because the bear stood up on his front paws. Poor Duncy almost landed in the other prospector's lap.

"The old prospector laughed in glee. 'You're not so good,' he plain to

## WIN \$25.00 CASH

IN THIS INTERESTING FREE COMPETITION

A cash prize of \$25.00 will be awarded to the person estimating the correct or nearest correct number of cubic feet of Gas that a No. 500 ELECTROLUX GAS REFRIGERATOR will consume in 30 days, under normal conditions in a home of four persons... starting Wednesday, April 15th, at 12 o'clock, noon.

## The Air-Cooled ELECTROLUX GAS REFRIGERATOR

The Miracle of "THE FLAME THAT FREEZES"

For complete information see Hudson's Bay Company advertisement in this paper.

# EDMONTON'S GAS COMPANY

## AIM TO SPEED UP SALES OF CITY'S LAND

Plans Will be Discussed at Special Meeting of Council Wednesday

Plans to accelerate the sale of city-owned property will be discussed at a special meeting of city council called for Wednesday night. Council members will also discuss the recommendation by city commissioners that the city should operate the operation of the city land department by private real estate firms be rejected.

### EDMONTON REVISION

Commissioners have recommended that they be empowered to meet with a committee of the Edmonton Real Estate Association for the purpose of hearing the association's suggestion for the sale of land sales. These include a downward revision of prices, that offer for the purchase of city property be dealt with by a board composed of civic officials and members of the association and that the city supply the association with a full list of all available property.

At Thursday's meeting officials will also discuss a scheme suggested by Mr. J. T. McCulloch for a public auction of city property during fair weeks. In this connection, John Peterson, head of the land department, has been quite willing to try out any scheme which would get the property back on the tax roll. However, the experiment is not too early.

**BLOCKING OFF SECTION**  
John Peterson is also recommending the blocking off of residential sections and offering attractive prices as an inducement to prospective purchasers to invest in them. He suggests the following scale of prices: between 80 and 100 acres, \$100 per acre; between 100 and 110 acres, \$120 per acre; between 110 and 120 acres, \$150 per acre; and for the balance of 120 to 130 acres, \$180 per acre.

## LOWER RATES FOR OUTSIDERS

No relief came coming to Edmonton from an outside municipality and applying for assistance here will be given an allowance higher than the relief scale prevailing in the municipality from which such person comes, city council decided Monday night on the subject.

In such cases, applicants will be given their "home" rate of relief. It is decided whether the applicant is to be given the rate of relief of the municipality from which he came, or the rate of relief of the municipality in which he is now living. The rate of relief of the municipality in which he is now living is to be given if the applicant is a resident of that municipality.

**Cool Tenders**  
To be Called  
Commodore's tender is to be called for tenders for the supply of coal to the power plant for a period of one year. The tenders will be opened on Monday at a supply for a longer period.

## MEIGHEN SAYS NO SHORT CUTS TO PROSPERITY

Integrity, Efficiency, Industry, Economy Bring Success He Claims

By PAUL HARRISON

Industry, economy, efficiency and integrity are the four virtues which will get Alberta and the rest of Canada "out of the red," the opinion expressed by Hon. Arthur Meighen, member of the Canadian House of Commons, and former prime minister of Canada, who was in Edmonton on Monday with J. S. McLean, president of Canada Packers Ltd., and other executives of that corporation.

While not singling out Alberta or Edmonton, Mr. Meighen made it plain that the application of the four above-mentioned virtues would do all that could bring back prosperity to a people who have been in depression, provincial and municipal governments, but for private corporations and individuals.

Deploping "short cuts" to prosperity, Mr. Meighen said that refunding, at lower interest rates for both public and private organizations could be carried out much easier if there had been no wild talk of repudiation.

**A NATURAL RESULT**  
"That is a natural result where there is a plethora of money as there is at the present time," he said, "but there must be confidence. Vancouver, which has been much talk of repudiation, is now going ahead with its refunding, but has been told to stop if there had been no talk of repudiation."

In his remarks Mr. Meighen said that the Canadian House of Commons had passed a resolution that 80 per cent of the government's debt should be paid in 15 years, 10 per cent, made a living, and five per cent, were marked success.

He said that the government's management, and this implied a management which would be in the interests of the stockholders as heart but which would be in the interests of the industry and the public.

That is what I mean when I say that industry, efficiency and economy are necessary to success, and that is what I mean when I say that integrity not only to the corporation but to the people and the country is what is required.

**CANADA PACKERS EXAMPLE**  
Mr. Meighen's remarks were made at a luncheon tendered Mr. McLean and other executives of that organization, on Monday by H. Ray Miller, K.C., and Percy Adams, K.C., and he pointed out that Canada Packers had been successful and before that as the Harris Abattoirs had been successful in their management, and this implied a management which would be in the interests of the stockholders as heart but which would be in the interests of the industry and the public.

Mr. Meighen, who spoke at the luncheon seated at the new \$100,000 plant of the new Harris Abattoirs, which they were trying out many new innovations, and he pointed out that the Harris Abattoirs had been successful in their management, and this implied a management which would be in the interests of the stockholders as heart but which would be in the interests of the industry and the public.

## SMALL RECOVERY WINNIPEG MARKET

reports from the United States southwest brought a measure of recovery on the Winnipeg Grain Exchange today. Wheat prices closed unchanged to  $\frac{1}{4}$  cent higher, May at \$1.14, July \$1.12  $\frac{1}{2}$  and October 83 cents.

Prices at Chicago finished above the previous close. Liverpool's trend was irregular, coincident with trade reports France may soon export further

Small sales of No. 4 Northern wheat for shipment at the opening of navigation on the Great Lakes was the only interest shown in the cash-grains market. Coarse grains prices, weak at the start, firmed in the market's late stages.

## REFUND PLAN TO GO AHEAD IMMEDIATELY

Hon. Charles Cockcroft  
Stresses Importance of  
Plan to Alberta

CALGARY, April 13.—Proposed refunding of Alberta's debt will go forward at once, Hon. Charles Cockcroft, provincial treasurer, said in an interview here Monday. He stressed the importance in the province of the plan to issue \$100,000,000 in perpetual securities, that amount representing half the province's debt.

At interest rates on Alberta's various bond issues fall due, Mr. Cockcroft declared, the suggestion will be made that the perpetual bonds be refunded in exchange at an interest rate of three per cent. This perpetual issue will not be redeemable in less than 25 years.

**THREE PER CENT**  
Besides the \$100,000,000 in perpetual bonds, the other half of Alberta's debt will be refunded at a three per cent interest rate, he said. By having \$50,000,000 of the province's debt in the perpetual issue, the provincial treasury added, Alberta will avoid the recurring charges made necessary by 10 or 15-year issues, where they expire make necessary further operations on the part of the government handing them and consequent expense to the province.

**SAVE ALUMINUM**  
Mr. Cockcroft said that in addition to the reduced interest rate which will be effective, the province in 10 years will save \$4,000,000 in administrative charges, and \$100,000 issue when compared with the expenses which would be incurred through handling 10-year issues.

The provincial treasurer estimated the annual saving to be realized by obtaining the three per cent interest rate would be \$2,500,000 on the province's total debt of \$160,000,000.

Andrew, one of the Bahama Islands, has a lake which generates about from its alkaline limestone bed.

## "Hay, There!" Glider Clips a Couple Of Feet Off Hay Stack

It looks like Don C. Stevens, noted glider pilot, was in an accident. But don't believe your eyes—he's only demonstrating the stability of his ship and

testing his skill at spot landings in preparation for the National Glider Meet in Elmira, N.Y., in June. At 75-mile an hour speed, he clipped two feet off the haystack near Venice, Cal., and landed immediately.

## WINNER OF EDDIE CANTOR PRIZE IS DISQUALIFIED BECAUSE HE PLAGIARIZED

NEW YORK, April 14.—Eighteen-year-old Lloyd Lewis of Pittsburgh, Mo., set in a Manhattan skyscraper, office just night and saw his dream of a college education swept away because he didn't understand the meaning of plagiarism.

Lloyd, announced as the winner of a \$5,000 prize essay contest sponsored by Eddie Cantor, the comedian, seemed nothing but bewildered as Cantor's agent told him he was disqualified from the prize because he had plagiarized, word for word, part of an article written several months ago by Dr. Frank Kingston, president of Newark University, for a magazine.

Cantor's contest was for a peace essay, and Dr. Kingston's

## Man Sentenced To Three Months For Slaying Relative

BELGRADE, April 14.—For killing his sister-in-law, Dragutin Vucich, a peasant was sentenced to serve two months in prison. He explained in court that the victim was a "vampire" who had caused the divorce of his son, the death of the son's child, and the disappearance of another child.

## Form Society Of Canadian Writers

MONTREAL, April 14.—Formation of a society of Canadian writers similar to the French academy, has been undertaken with the issue of letters patent for this purpose by Hon. E. L. Poirer, M.C., lieutenant-governor of Quebec, to Rev. Oliver Masson, rector of L'Université de Montréal, Jean Bouchard, novelist, and Albert Levesque, author and professor at L'Université de Montréal.

Seven of the sons of Maudslayi Hall, master of Maudslayi Hall, 1672 to 1727, assumed the title of emperor.

## LEAGUE UNDER FIRE AGAIN IN FRENCH PRESS

British Foreign Policy Also  
Comes in For Strong  
Criticism

PARIS, April 14.—Criticism of the League of Nations and of British foreign policy continued in the press and in election speeches last night.

Louis Germain-Martin, former finance minister, in an election speech broadcast on behalf of the left party, said the League was no longer sufficient to guarantee the peace of Europe. He urged that the League be reinforced by a constructive plan embodying effective guarantees which will prevent any surprise act by an aggressor nation.

The conservative newspaper Temps renewed its criticism of Britain.

## TWO PROBLEMS

Two problems confront the British, the Temps said, "that of sanctions to apply to Italy and the negotiations with Berlin in order to obtain guarantees, without which general negotiations cannot be successfully conducted."

The newspaper observed that Britain apparently wanted to settle with the greatest speed in settling the Italo-Ethiopian war, while as regards Germany she was pursuing a carefully calculated plan to offset by every delay to reach a compromise.

**DEFINITE LAWS**  
It is the double preoccupation of Britain which is so disconcerting to European public opinion, the newspaper declared. The international laws and the doctrine of Geneva are definite laws. We can discuss them and their interpretation, but the execution of them for all nations bound to the covenant.

"It is inadmissible that these laws be applied in all their rigor to Italy and that they be modified almost to an ingratulating degree toward Germany, whose threat against France is infinitely more dangerous than that of Italy."

The sensational campaign is taking

## VESSEL RUSHES SEAMAN HOME; SUFFERS COLD

NORTH SYDNEY, N.S., April 11.—With all her senses as spread before a spanking breeze, the Gloucester racing schooner, Gertrude, Thruaid, sped into port Monday to land a seaman believed to be seriously ill. Doctors found he was suffering from nothing more than a heavy cold, caused by the Arctic McLeod prepared to return to the fishing banks without delay.

The weather on the banks had been stormy and good fishing was scarce. The seaman, a veteran skipper, said he had about 40,000 pounds of fresh fish on board, taken in three weeks.

## FLOOD WATERS HIT STOCKTON

REGINA, April 14.—Steadily rising waters of the Qu'Appelle river at London and in the Bogue Creek Valley, nearby, forced cattlemen to move stock from flooded ranches in London since Sunday evening and three inches in the flood by early day of today.

Several other families were ready to move away at any time.

In a 24-hour period the river rose 18 inches in London since Sunday evening and three inches in the flood by early day of today.

World consumption of wood annually is 50 per cent more than the quantity grown.

Several other families were ready to move away at any time.

"There is talk even of military or semi-military actions against Italy, despite the fact that military actions have been formally excluded from the Geneva negotiations since the first day of the Italo-Ethiopian question arose."

## FORT WILLIAM LASSIE SLAIN

Gordon Blais of Fort William is being held by police on a charge of assault after the body of Mildred Johnston, his wife, was found in the Blais home. Miss Johnston's head was battered, and a man's face was warped tightly around her neck.

## POTATO FAMINE IS PREDICTED

CHARLOTTETOWN, April 14.—Commenting on report that Ontario is faced with a potato shortage, the Maritime Provinces, said today a believed Canada would be faced with an "Absolute potato famine before May 1."

At the present time Prince Edward Island had "The only potatoes in the Maritime Provinces," he said.

Crowds still are used as money in some isolated communities of the South Seas, India, and Africa. The shells are taken from shallow spots in the bed of the Indian Ocean.

## PAUL WENDEL IS ISOLATED IN JAIL CELL

Reports Lawyer Threatened  
by Prisoners Denied  
By Officials

TRENTON, N.J., April 14.—Paul H. Wendel, the former Trenton attorney whose reputation "condemnation" of the Lindbergh baby kidnapping-murder started a two-state investigation, was isolated from other prisoners in Mercer jail Monday on the eve of the county grand jury's reopening of the case.

## REPORTS DENIED

There were reports, denied by officials, that Wendel had been threatened by prisoners because of his report identification of an ex-convict as one of four men who drugged the Lindbergh baby, and tortured him into "confessing" the Lindbergh crime.

The fact the grand jury has subpoenaed more than a score of witnesses for today and Wednesday was taken as indication the new investigation of the Wendel phase of the Bruno Richard Hauptmann case may be more extensive than the inquiry "discontinued" two weeks ago.

## C.N.R. Bridge Spans Carried Away In Flood

RED DEER, April 14.—Three out of four spans of the Canadian National railway bridge were carried out here on Monday at we went out of the Red Deer river. An M.&B. crew had been crisscrossing the bridge during the winter and had taken down the super structure. All the spans were a false, well supporting the rails.

The north span went down on Monday just before after water had been rising since early Sunday and had come up again during the day and at 7:30 p.m. the second and third spans were also carried out. The south and remaining span seems likely to be carried out by Monday morning.

# EATON'S SPECIALS
